Discover the best

At Pentel we pride ourselves on quality, innovation and reliability, which is reflected throughout our entire range. In the following pages you will find all your favourite products, together with new and exciting items, giving you the performance you expect from Pentel.

From the quick-drying, smudge-reducing EnerGel, to unique Hybrid Dual Metallic pens, to the colourful and convenient Pentel Arts collection, there's something to inspire everyone to be creative.

Our Recycology range reflects our commitment to manufacturing products that are better for the environment. The collection includes display books and presentation files that are all made from at least 50% recycled materials, without compromising quality.

For trade customers, to complement our range of products we offer a variety of merchandising

solutions and displays. For more information see page 64.

Pentel have a company-wide total quality management programme and many of our factories are registered to ISO standards. We recognise the importance of developing products that benefit consumers and the environment by using low-odour inks and recycled materials where possible.

For more information on any of our products please contact your local representative or call our customer services team on **00 44 (0) 1793 823333**.

# WHAT'S NEW

When it comes to innovation and excellent performance, fresh thinking and outstanding new ideas you'll find our 2021-2022 catalogue full of exciting products and initiatives.

It's estimated that over two-thirds of the writing instruments technology we take for granted in the world today has been inspired by Pentel innovation. And it's thanks to the efforts and close collaboration of our research and development and production teams that we continue to create products that are not only fit for purpose, but inspiring.

Our fantastic EnerGel range, which has just celebrated its 20th anniversary, continues to grow. We're adding more beautiful colours to the EnerGel Xm Retractable family, offering consumers an extensive range of 20 colours to choose from. New to the family is EnerGel Noir; its slim matt barrel and lightly grooved finger grip make it a pleasure to write with.

The latest additions to our popular gel pen range continue to amaze: with seven new sparkling colours, Hybrid Dual Metallic pens are truly incredible. Infused with two colours of glitter into the dye ink the effect is like a hologram. Remaining unique to Pentel, the stunning range of Hybrid Dual Metallic pens now have 15 shimmering colours available and are perfect for use on cards, decorations and drawings.

The bright, modern iZee (easy) makes a fabulous addition to the ballpoint pen range. Designed in France, iZee is available in an array of

vibrant colours and a choice of retractable or cap style versions, making it perfect for everyday writing. A twist on the original Superb pen sees the introduction of Superb Anti-Bacterial. Its barrel is treated with anti-bacterial formula to help prevent the spread of germs and reduce the risk of infection. Ideal for use in educational, medical, food and cosmetic industry environments.

Our Graphgear pencil family is renowned for its quality, reliability and performance and the latest additions are no exception. The fresh new colours of Graphgear 300 not only look fantastic but are available in four lead sizes to suit all needs.

A broad tip has also been introduced to the Maxiflo range offering the usual benefits of Maxiflo ink technology while producing vivid, dense and solid lines making messages and charts stand out.

Our Pentel Arts range, which is ideal for artists, students and craft enthusiasts, continues to offer new and exciting products. In addition to the wide variety of high-quality art materials already available, we've introduced a further 12 beautiful colours to the Brush Sign Pen family. Its flexible brush-like tip makes it ideal for modern lettering, calligraphy, illustrations and journaling. Draw, sketch and write with the new Pointliner, which contains ISO-certified water and fade-resistant pigment ink which can be used with watercolours and dye ink products. It's available in five tip sizes and is ideal for creating the most intricate details or bold lines and shading.

Our product ranges are updated during the life of this catalogue, so for the latest information please visit our website [www.pentel.co.uk](http://www.pentel.co.uk)

# CORPORATE PARTNERSHIPS

**Pentel is proud to be a corporate partner of Breast Cancer Now and Prostate Cancer UK. Thanks to your support we continue to raise thousands of pounds to help fund vital projects in the UK and Ireland to improve the lives of those who suffer from these diseases.**

We've supported Breast Cancer Now since 2006 and have raised over **£1.4 million** for the charity to date. Our relationship with Prostate Cancer UK began in 2009 and donations to the charity are in excess of **£628,000**.

Our special edition products are available from many customers, plus our own online store. We make a donation to the respective charity for every pen sold through these channels.

Find out more about our partnerships with Breast Cancer Now and Prostate Cancer UK and help us raise more money to support the work of these important charities.

Breast Cancer Now is the charity that's steered by world-class research and powered by life-changing care. They're here for anyone affected by breast cancer, the whole way through, providing support for today and hope for the future.

They believe that if we all act now, we can change the future of breast cancer and make sure that, by 2050, everyone diagnosed with the disease lives – and is supported to live well.

Visit [www.breastcancernow.org](http://www.breastcancernow.org) for more information

**See page 13 for product details.**

Prostate Cancer UK is leading the fight against prostate cancer. They're here for the millions of families concerned

or affected by prostate cancer wherever they live in the UK. They support men and their families living with the impact of prostate cancer now, fund research to protect men in the future and campaigns to raise awareness and drive change.

**See page 13 for product details.**

# RECYCOLOGY

## PENTEL AND THE ENVIRONMENT

Our commitment to the three Rs – **reduce, reuse, recycle** – is encapsulated in one word: **Recycology**.

It's how we describe the efforts we make to use natural resources sensitively and responsibly throughout our business. It's also about how Pentel can help you choose products that have a **reduced impact on the environment**.

We offer you a wide range of writing instruments, filing products and display books made using a minimum of 50% recycled material. Plus, many of our pens, and all our pencils, are refillable.

### ACTING RESPONSIBLY WITH RECYCOLOGY

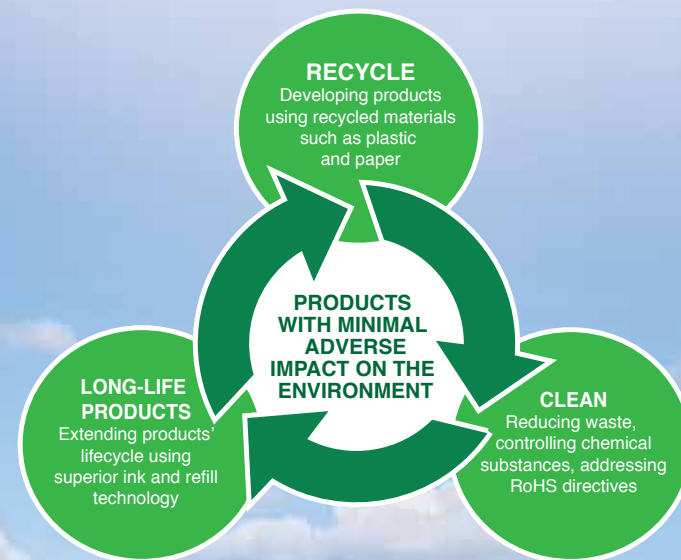

At every level of our business we're working hard to help preserve and protect the environment, whether that's by using recycled plastic in our pens or introducing new cardboard packaging for our customers.

This isn't new for us. Our parent company in Tokyo has a dedicated environmental management framework based on its Environmental Principles programme that was established in the mid-1990s. This framework informs, develops and

operates environmental management systems to make Pentel activities at factories and offices more effective in terms of sustainability and protection of the environment. Pentel's factories in Japan, Taiwan, Thailand and Mexico are all accredited to ISO 14001 for environmental management systems.

In product development Pentel factories have a duty to use recycled materials wherever possible. And it's always been our goal to make products that last a long time or can be refilled, to reduce the need to throw away perfectly usable products.

And what could be more responsible than a refillable pencil? Pentel have been designing and manufacturing mechanical pencils for more than 50 years. Each time you choose a Pentel mechanical Pentel you're helping to reduce the requirement for thousands of trees that are chopped down every year to make traditional wood-case pencils.

# REDUCE, REUSE AND RECYCLE

\*Percentage based on total weight of product excluding consumable elements.

### LOCAL ACTION

In the UK we want to encourage everyone who buys a Pentel product that can be refilled to do just that. So that's why we've developed our message, **'If You Love It, Refill It'**, to help identify those items that can be used over and again. When you view our catalogue, you'll see this logo next to certain products and you'll find the refills listed, to make it easy to select the right one.

We're all aware of the need to reduce or eradicate single-use plastic in packaging and it's no different at Pentel. Boxes of Pentel loose pens, pencils and markers are made using recycled board, and we're introducing many new wallet sets made from board, not plastic.

Where we continue to use recycled polypropylene for best protection of products, we encourage you to keep your Pentel products together in these sets, or to recycle the plastic appropriately. In addition, many of our most popular blister packs now also include a reminder that you can recycle the card and plastic separately.

### RECYCOLOGY DISPLAY BOOKS AND PRESENTATION FILES

Nearly 15 years ago Pentel launched a range of display books, presentation files and folders, **all made using 50% recycled materials\***. Recycology filing products use fewer valuable resources than non-recycled equivalents, without compromising quality. Ideal for projects, presentations, recipe collections or hobbies, the Recycology range is ideal for office, school or home and helps you keep precious documents and photos protected and organised.

### RECYCOLOGY WRITING INSTRUMENTS

Where you see the Recycology logo next to a Pentel product this denotes that the item contains a minimum of **50% recycled material\***. Where practical, our factories try to manufacture as many products using recycled material as possible. We're proud to say that two thirds of our quick-drying EnerGel range is classified under the Recycology umbrella, including our hugely popular EnerGel X retractable rollerball, which is made using a minimum of 84% recycled material (and it's refillable).

And don't forget to refill your Pentel pen or mechanical pencil. Over 40% of the products in our entire UK range can be refilled, even including our Roll 'n' Glue and Brush Glue bottles.

**So, there's really no need to throw away a perfectly re-usable Pentel product.**

# ENERGEL

With its revolutionary low viscosity liquid gel ink, the EnerGel formula is **quicker drying** and smoother flowing than ordinary gel ink, giving a similar sensation to liquid ink. Because the ink dries super quickly it's appreciated by right and left-handed writers alike, as it reduces smudging on paper or hands.

Unlike liquid ink products, though, EnerGel doesn't need a regulator to control its flow – the ink is delivered directly from the reservoir or refill to the tip in one smooth transition. That's why the family of EnerGel products gives you the ultimate, yet affordable, writing experience. The majority of the EnerGel range is made from a minimum of 50% recycled material.
